Art Unit: 1625

DETAILED ACTION

1. Claims 1-20 are pending in the instant application.

Priority

2. This application is filed on 01/05/2007, which is a 371 of PCT/FR05/01528, filed on 06/17/2005, which claims priority of FRANCE 0406617, filed on 06/17/2004.

The priority document, however, is not in the file. The claimed benefit of priority date is denied. There is no certified translation of the priority document. The filing date of the instant application is 06/17/2005.

3. Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 8 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. V. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966). These claims are withdrawn from consideration.

4. Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 10/561,844

Art Unit: 1625

Claims 1,4, and 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 8 provides for the use of compounds as clamed in any of the claims, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

- 5. Claim 1 is rejected because there is no period at the end of the claim 1. Correction is required.
- 6. Claim 6 is rejected because the term "substrates" is confusing. What the "substrates" mean? Clarification is required.

7. Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2-7, and 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Bergstrand et al. US 5,753,265. Bergstrand et al. disclosed the instant claimed compound on column 3,

Application/Control Number: 10/561,844

Art Unit: 1625

and sodium salt of the compound to treat gastric ulcer and other gastrointestinal disorders. Therefore, the instant claim is anticipated by Bergstrand et al.

8. Claims 2-7, and 9-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsuishi et al. US 5,753,265. Matsuishi et al. disclosed the instant claimed compound on Table 5, Example # 2

and sodium salt of the compound to treat gastric ulcer and other gastrointestinal disorders. On column 4, lines 19-28 of the prior art sodium hydroxide and sodium carbonate are useful as bases at temperature of 10-200°C. Therefore, the instant claim is anticipated by Matsuishi et al.

9. Claims 1,3,11-13, and 15-20 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Matsuishi et al., US 4,808,596 and Bergstrand et al., US 5,753,265. Matsuishi et al. shows the instant compound and Bergstrand et al. used the compound and the sodium salt of the compound. "The inherent teaching of a prior art reference, a question of fact, arises both in the context of anticipation and obviosness." *In re Napier*, 55 F.3d 610,613,34 USPQ2d 1782, 1784 (Fed. Cir. 1995) (affirmed a 35 U.S.C. 103 rejection based in part on inherent disclosure in one of the references). See also *In re Grasselli*, 713 F. 2d 731, 739, 218 USPQ 769, 775

Art Unit: 1625

(Fed. Cir. 1983). In the instant specification, on pages 7-8, the monohydrate sodium salt is made in salifing step. Therefore, on salifing the compound in Matsuishi et al. or Bergstrand et al. to form the sodium salt of Bergstrand et al. a monohydrate would be produced.

10. Allowable Subject Matter

Claim 14 is patentable over Li et al., CN 1453278. The reference teaches the analogues process of preparation of the Tenatoprazole salt. The reference does not teach vanadium based catalyst which is used in the instant application. Therefore, the claims are free of prior art.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Niloofar Rahmani whose telephone number is 571-272-4329. The examiner can normally be reached on Monday through Friday from 8:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Andres, can be reached on 571-272-0867. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
